

Media Response

13 August 2025

**Please attribute the following response to Greater Dandenong City Council
Executive Director City Futures, Sanjay Manivasagasivam:**

Greater Dandenong City Council accepts plastic resin codes 1, 2 and 5 for kerbside collection in commingled recycling bins, which are taken to Re.Group in Dandenong South for processing.

Residents can use the Recycle Mate tool, available on our website, to find out how to appropriately dispose of items through kerbside collection bins.

More information is available on our website –
www.greaterdandenong.vic.gov.au/which-bin

From The Age

We're currently working on a guide to recycling in each local council in Victoria, and were hoping you could provide the following information in relation to your council:

- for commingled recycling, what plastic resin codes does your council accept?
- what Materials Recovery Facility does your kerbside commingled recycling go to?
